

# Sean Conway

Austin, TX | seanconway.tech | sean\_conway@me.com | (512) 888-4259

---

## Experience

### Electronic Product Designer

*Independent Invention | May 2025 - Present*

- Designed and developed multiple iterations of BLE wearable prototypes for grappling sports officiating
- Developed embedded C++ firmware for sensor input, gesture recognition, and wireless communication
- Designed PCB integrating IMU sensors, battery charging, LEDs, and haptic feedback
- Developed Python host application interfacing with nRF52 BLE bridge for scoreboard control
- Designed wearable enclosure using 3D CAD and additive manufacturing
- EMC/EMI aware design

### Capstone Engineering Project

*Texas A&M University | August 2025 - May 2026*

- Developed Radar and Infrared integrated Multi-Sensor Weapon Detection System
- Integrated TI mmWave module with motorized X-Y gantry for 3D radar imaging
- Implemented sensor coordination and data collection using Python on Raspberry Pi
- Developed computer vision facial recognition and object detection pipeline
- Integrated sensor insight and control functionality with Python based web GUI

### Software Engineering Intern

*Kreign, Woodlands, TX | May - August 2025*

- Developed Python tools for procurement report generation using SQL and Pandas
- Automated data processing workflows for industrial construction operations

### Sales Intern

*Commencement Group, Austin, TX | May - July 2023*

- Managed high-volume product sales during graduation events
  - Worked extended shifts in fast-paced retail environments handling customer transactions
- 

## Education

### Texas A&M University

2026

*Bachelor of Science, Electronic Systems Engineering Technology | Minor in Cybersecurity*

**GPA:** 3.1/4.0

**Coursework:** Embedded Systems Software, Microcontroller Architecture, Embedded Sensors & IoT Systems, Digital Electronics, Analog Electronics, Electronics Testing, Electronic Instrumentation, Electromagnetics & High Frequency Systems, Power Systems & Circuit Applications, Product Development, Advanced Network Systems & Security, Wireless Transmission Systems, Control Systems

---

**Skills:** Python, C/C++, RTOS (Zephyr), Linux, SQL, Git, MATLAB, PCB Design (KiCad), 3D CAD (Fusion & FreeCAD)

**Platforms & Protocols:** nRF52, ESP32, Raspberry Pi, I2C, UART, SPI, TCP/IP, UDP, BLE, SWD

**Equipment:** Multimeter, Oscilloscope, Function Generator, Logic Analyzer, VNA, ATE, Soldering (Iron & Reflow)
